Art Unit: 1615

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "type" in claim 3 is a relative term which renders the claim indefinite. The term "type" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. No basis is

Art Unit: 1615

given for determining what is included and excluded by the term type. The term fails to further define the subject matter in a clear concise manner that sets forth the metes and bounds of patent protection desired.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1, 2, and 9-13 are rejected under 35 U.S.C. 102(e) as being anticipated by

Shimizu et al US 6,328,994 B1 . The reference shows finite particles which are coated to enable disintegration in the mouth. The identical methacrylic acid-ethyl acrylate copolymer as applicants' is utilized. The composition would inherently provide taste masking. See column 2, lines 18-30, column 6, lines 9-16, column 7, lines 35-39, column 9, lines 9-29, especially line 17, column 15, lines 36-40, column 37, lines 15-25, claims 1, 16 and 17.

Art Unit: 1615

Claims 4-8 and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Kolter et al reference US 6,555,124 B1 shows coated microtablets which may be of interest. See column 4, lines 25-26, column 5, line 62 through column 6, line 59..

Claims 1-3 and 9-13 are rejected.

Claims 4-8 and 14 are objected to.
